

首创豆制品行业
专用煮浆设备

▲ 燃气节能煮浆机

产品简介

大能燃气节能煮浆机是专门为豆制品行业研发制造的煮浆设备，该产品采用一键式电子点火方式，操作方便、性能稳定、热效率高、产汽快、出蒸汽分布均匀。

五年历练，性能卓越，节能显著。

- 高效、节能环保
- 一键式操作，使用方便
- 安全、可靠

▲ Gas-Fired Energy-Saving Soybean Milk Processor

DaNeng's Energy-Saving Soybean Milk Processor is equipment specializes in processing of soybean milk, Bean Curd production and designed to be used in bean related products. The equipment port fire of electronic pulse is operated by one click switch; it is easy to operate with steady capability. It saves GAS up to 65% and reduces CO 88% as compared to traditional cooking equipment; the speed of turning cold water into steam is 120s, it turns hot water into steam within 5s. It effectively reduces boiling time. Its full stainless steel casing with lofty processing skill is to enhance this high quality equipment.
